Added Subgrid Worker and Check Function along with added row threading

commit 2d2c8b75d22cde8da7116507c2fd9350c0b17852
Author: Nunziomvd <154708602+Nunziomvd@users.noreply.github.com>
Date: Tue Mar 5 18:26:32 2024 -0500

Updated main function, Added new function checkwiththreads

- Main function now lets user pick option to thread
- Main function runs clock after option is picked and prints solution along with time after threading is done
- Removed thread creation and join from the main function

- Checkwiththreads function

- Option 1 creates a thread for every column to check numbers, joins them all at the end.
- need to make option2 and option3
